## Growing sustainably since 2007

Accoya® wood has been produced commercially since 2007, initially in small volumes, then growing as manufacturers and architects gained an appreciation of its characteristics. Accoya Color shares all these attributes and more.

For a low-maintenance decking that withstands wear and tear in any climate, Accoya Color is the answer. Resistant against cracks and splinters, with superior stability compared to typical decking boards, it combines the charm of real wood with exceptional performance. Perfect for extending your living space to the great outdoors – barefoot and fancy-free.

## Performance that lasts a lifetime

Unlike traditional wood decking, Accoya timber decking is resistant to rot and insect attack, so it creates a premium, low-maintenance deck that will look its best for years to come - with little to no work needed.

## Finish that suits your design

Less shrinking. Less swelling. Less distortion. All of which means your Accoya Color wood decking can be laid with confidence that it will perform reliably - right now, and for decades to come.

## Sustainability unrivalled in the market

Unlike most wood decking, which may use composite or slow-growing tropical hardwoods that might be illegally logged, Accoya is made using only sustainably sourced FSC® timber. It's also 100% non-toxic, 100% recyclable, and has the lowest carbon lifecycle footprint of any decking solution available today. So, when looking for sustainable decking for your project, Accoya Color is the responsible choice.

## Tried and tested

Accoya is a fully proven product with testing from a range of perspectives, on a worldwide basis. Rigorous tests have been conducted in real-life conditions, over many years.

For many years, Accoya has been, and continues to be used by scientists as the benchmark against which other treatments and modified timbers are measured.

## Natural wood

Accoya Color Grey is a natural wood product that is subject to variations in shade and uniformity of color between boards. Please note that there can be small, less-colored areas within grade. While every piece of Accoya Color Grey is colored surface to core, ensuring high durability and low maintenance, please be aware the product may look lighter or darker depending on the batch, natural wood characteristics, and the environment the product is used in.

## Easy to clean

All wood decking requires cleaning at least once a year - and Accoya Color makes this easier than ever.

Gentle cleaning is recommended with nothing more than soapy water or a mild cleanser. Be sure to rinse with plenty of water after cleaning. And remember to avoid high-pH cleaning products and pressure cleaners, as they can damage your deck and void your warranty.
